1. Introduction

This Stormwater Report has been prepared as part of the City of Milton Public Works Permit for the single family construction project.

Drainage requirements for the City of Milton are described in:

- In the Department of Ecology 2019 Stormwater Management Manual for Western Washington click link at <https://tinyurl.com/3p43dhvb>
- Milton Stormwater Code, Chapter 13.26 and 13.27.
- City of Milton Development Guidelines and Public Works Standards

2. Existing Site Description

Please describe the existing conditions for the site. Address the following as appropriate:

- Existing conditions including topography
- Existing onsite and downstream drainage analysis
- Critical areas such as wetlands, streams, steep slopes, etc.
- Soils

3. Description of Project

Describe the developed conditions for the site. Address the following as appropriate:

- Buildings and other structures
- Driveway and other paved areas
- Proposed stormwater management facilities
